SECOND CHANCE SCHOOL  
KOMVUX SÖDERVÄRN

## BACKGROUND

Second Chance School was set up by the European Commission as a project to combat unemployment amongst young people. The target group are young people who have left school without proper qualifications. The basic idea is to offer a new type of school for these people, who often have a strong aversion towards traditional education. In addition, Second Chance School should have strong links to local partner firms, as a way of facilitating integration with the labour market.

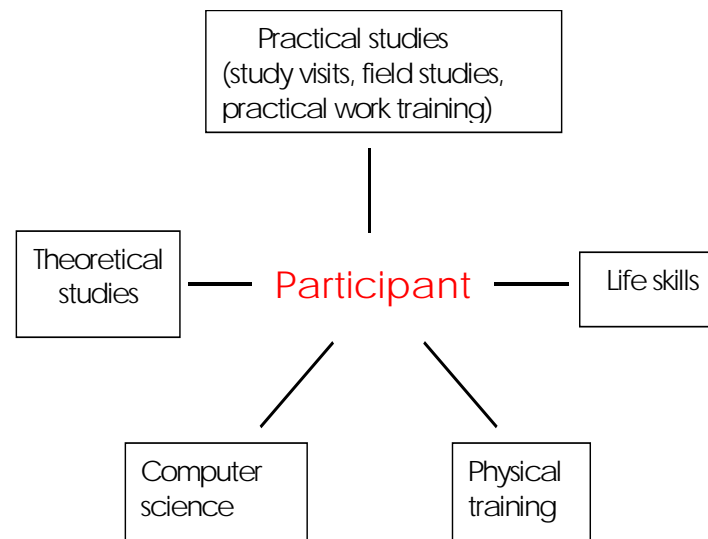

## AIMS AND OBJECTIVES

The aim of the E2C course at Komvux Södervärn, Malmö, is that the participants find a way into the labour-market, either by employment or by moving on to vocational training. Furthermore, we hope that the participants change their attitude towards school and education, so that further education might be an option. In order to reach our goal we focus on:

- creating an inspirational and motivational inner as well as outer environment.
- customizing individual solutions.
- helping the participants realize their strenghts and interests.
- supporting the participants in setting up realistic goals.
- offering study visits, field studies and practical work training, through which the participants gain an insight into society and the labour market.

## CONTENT

The course consists of five different modules, which are combined according to the individual participant's needs:

## STAFF

Two full time employed teachers function as head teachers and mentors. In addition, a study counsellor as well as a social welfare officer work with the group on a regular basis. We also have access to a computer teacher.

## COOPERATION

E2C at Komvux Södervärn cooperates with the City of Malmö and local partner firms, as well as with other E2C schools nationally and internationally.
